## The concept behind nodo

The word “nodo” means a “knot” or “intersection” in Italian.  
We offer items with a playful touch that combines craftsmanship  
with maximum inspiration behind the materials used.

nodoはイタリア語で「結び目」、「交点」の意。  
熟練された職人の技術と素材に対する自由なインスピレーションを結び  
合わせ、遊び心のあるアイテムを提案します。

## Craftsmanship

The first collection from nodo has been born.

We make unique accessories based on Japanese craftsmanship.

The making of these bow ties was inspired by the texture created through metal processing. The bow has been cast in aluminum, and its design takes advantage of the characteristics of the material such as its light weight, corrosion resistance, and high plasticity.

The neck strap, made of Japanese silk, has been sewn carefully by hand, one at a time. We have paid attention to every detail in creating this product.

職人の技術を装身具としてデザインするブランド、  
nodoのファーストコレクション。

金属加工によって生みだされる質感表現を追求した蝶ネクタイです。

リボンは鋳造の技術を基に、軽量で錆びにくく形状の自由度が高いアルミニウムの特性が活かされたデザイン。ベルトは日本製のシルクを糸の選定から行い、職人が一つ一つ手作業で縫製。ディテールまでこだわりをもって作られています。

## black/matte

The black model has a matte finish to make the most of the appearance of the cast surface that naturally appears during the process. Sandblasting and anodizing the uneven surface particular to casts creates an unrefined but deep, unique texture.

ブラックモデルは、鑄造時に自然にあらわれる鑄肌の表情を活かしたマットな仕上げ。鑄物特有の凹凸のあるテクスチャの上にサンドブラスト加工と黒の染色加工を施すことで、無骨だけど奥深い、唯一無二の黒の質感が生まれました。

## silver/polished

The silver model has a mirror finish with the brilliance of metal. Craftsmen have carefully polished the bow by following its complex shape. The color of your clothes and your surroundings will be reflected in the bow's surface. The appeal of this product is its ever-changing brilliance.

シルバーモデルは、瑞々しい金属の美しさを引き出した鏡面仕上げ。複雑な形に沿うように熟練の職人が丁寧に研磨加工を施しています。柔らかな鏡面には纏う服の色や周りの環境が映り込み、変化する輝きが魅力です。
